

## IMPACT

In less than one year, local doctors rallied into an organization over 3,000 strong. This unprecedented force of mercy and medicine united to defend the greatest health care system on earth.

We took the lead in warning the nation about ObamaCare in national newspapers like the *Wall Street Journal* and *Washington Times*, and leading internet sites such as the *Drudge Report*, *BigGovernment.com*, and *RealClearPolitics.com*

Our doctors made “House Calls on Congress” visiting hundreds of Congressional Offices on Capital Hill in the lab coats we earned to finally give our leaders the real opinion of the family doctor - as opposed to the bureaucrats at the AMA *pretending* to speak for American’s physicians.

The last straw came with the recess appointment of Dr. Donald Berwick. We delivered letters to each Senate office and published national editorials leading the charge to reveal the Administration’s socialist agenda through the government run health care advocacy of Dr. Berwick.

## CREDIBILITY

Among the most trusted voices in the average American’s life is the family doctor. Imagine the impact of each doctor taking two minutes to explain ObamaCare to their patients at the end of each appointment. Millions will be moved by just our existing members alone.

We lead the stories that matter to millions from revealing the hypocritical “doctors” endorsement of ObamaCare by the AMA with its hand in the government till to the nomination of avowed socialist Berwick to run CMS (Centers for Medicare & Medicaid Services).

## WISDOM

When the media claims the US health care system is falling behind the world of socialized medicine, ONE group has the wisdom, the facts, and the credibility to stand up and demolish the platitudes. *By virtually every measure, worldwide, patients wait longer, suffer more, and die sooner in socialized medicine.*

*Make a Strategic Investment*

*in mercy, in medicine, in America*
